

ACCUSAFE

Fixed Point Gas Detection WITH SMART SENSOR TECHNOLOGY

Enhance workplace safety with AccuSafe's advanced sensor technology. With up to ten sensor modules reporting to a single controller via Modbus TCP/IP, distance is no barrier. Each module houses an integrated sample draw pump and built-in data acquisition, eliminating the need for extra software. Opting for a Sensor Unit with a concentration display and alarm indicators, transforms it into a standalone gas detector for single-point applications. AccuSafe represents modern advancements in continuous gas monitoring, simplifying operations while ensuring a safer environment.

Safety Focused

Trace Gas *Detection*

- Early detection prevents workplace fatalities.
- Simple sensor replacement reduces downtime.
- Data logging capabilities for historical trend analysis
- Enhances compliance with safety regulations.

SensorExpress™

DIY Hassle-Free Sensor Replacement

Seamless sensor management with SensorExpress and the Interchange Sensor System - ensuring continuous monitoring and safety with minimal downtime.

- Maximizes safety by reducing sensor replacement downtime.
- Timely sensor deliveries tailored to your needs.
- Quick, tool-free gas sensor replacement.
- Uninterrupted monitoring with hassle-free sensor configuration.
